A Touchstone Energy® Cooperative

Medical Alert Registration Form

Instructions:

The Medical Alert Registry allows the Cooperative to consider a member's life-threatening health condition dependent on the operation of electrical equipment whenever possible. The Cooperative can provide advance notice of planned disruption for maintenance purposes, provide information to help members make decisions regarding their health and comfort, and help members and their caregivers evaluate the need to evacuate to a shelter or other accommodations in the event of an extended power disruption.

Placement on the Registry does not guarantee uninterrupted service, prevent electric service disruption, or relieve a member's responsibility to maintain an account in good standing. Nor does the registry guarantee that members with severe medical conditions will be able to have their electric service restored following a natural or man-made power disruption without consideration for the greater good and safety of the general public.

These definitions apply in using this form:

Medical Emergency Patient - An existing medical condition of the member or the member's household that will be aggravated by the lack of utility service, as defined and certified by a physician or public health official on this Medical Alert Registration form.

Critical Care Patient - An existing medical condition of the member or the member's household that requires home medical equipment or a life support system that is immediately life-threatening during an interruption of service.
