

Eligibility Criteria for Business Lighting Rebate

- Must be a member of the cooperative
- Program available to all business classes of cooperative
- A separate application form must be completed for each installation site
- Only applicants that have greater than 10 bulbs or fixtures qualify for a rebate
- Rebate amounts are based on kilowatt-hours saved. Estimated savings can be calculated and provided by a Cuivre River representative.
- The total rebate for each member per year is capped at \$30,000
- Total rebate cannot exceed 40 percent of the total capital cost of the new lighting equipment

Instructions on how to receive your lighting rebate:

1. Using the lighting program application and lighting tables, a walk-through of your facility must be conducted by the cooperative or designated representative to establish existing lighting inventory.
2. Members and/or their selected lighting vendor must complete the new lighting section of the application.
3. **Pre-approval** is required before you purchase and install the lighting equipment. Send the completed application and your quote for the total lighting equipment cost (from lighting vendor) to the cooperative for the estimated rebate amount and for approval to purchase new lighting fixtures/bulbs.
4. After the cooperative approves the proposed lighting, you may install the approved lighting equipment to receive your rebate.
5. After installation, send the completed application and receipts to the cooperative for reimbursement. The cooperative will perform a walk-through to verify lighting installation before issuing the rebate.

Note: Vendor installing new lighting is responsible for appropriate disposal of replaced fixtures/bulbs.
